THE STORIES WE TELL

STORIES AS HARD DATA: A QUALITATIVE APPROACH TO EVALUATION

Emerald Cronin, MSW Candidate 2016
Kara Siedlik, MSW Candidate 2016

EXPECTATIONS
EXAMINING THE ORIGIN

**noun story ˈstoʊr-ē**

*a : a fictional narrative shorter than a novel; specifically*

*b : the intrigue or plot of a narrative or dramatic work*

**noun ˈbāŋk**

*a : a place where something is held available <memory banks> ; especially : a depot for the collection and storage of a biological product <a blood bank>*

WHY ARE WE INTERESTED?

Pairing social work values and principles with evaluation best practices

- Backgrounds in social work
- Worked in non-profit settings
- Challenging the idea of people as numbers
- Accounting for the power of data in evaluation
Based on the definition, let’s create a list of evaluation methods which might fit under the category of storybanking.
Talking about real people humanizes the information.

It is easier for people retain the information when it is tied to a real person’s experience.

It depoliticizes the issue. It’s not about a candidate or a party, it’s about a person.

In areas where it is difficult to discuss reform effort, sharing a simple story is a way to open a dialogue.
CONS OF UTILIZING STORYBANKING

Storybanking works best in combination with other methods for gathering, analyzing and reporting data.

It doesn’t provide comprehensive information about the impacts produced by an intervention.

The time commitment necessary for storybanking may be daunting.
Storytelling lends itself to participatory change processes because it relies on people to make sense of their own experiences and environments.

Stories can be used to focus on particular interventions while also reflecting on the array of contextual factors that influence outcomes.

Narrative methods can be integrated into ongoing organizational processes to aid in program planning, decision making, and strategic management.
Narrative data can be analyzed using existing conceptual frameworks or assessed for emergent themes.

Stories can be systematically gathered and claims verified from independent sources or methods.

(McClintock, 2004)
Organizational Topics

How I feel about the group dynamics...

A major change or transition and how the organization handled it...

A time when I needed help and couldn’t get it...

A time when I was happy with the help I received...
TOPIC EXAMPLES

Learning and Change Topics

I learned something that changed how I work...

The biggest change I ever made was...

The most important thing I learned was...
Program Topics

In the last year the program has...

The program has changed the way...

I find it challenging to participate in the program because...
BUT ISN’T THIS A KEY INFORMANT INTERVIEW?

Collecting stories is viewed as an unstructured interview.

Interviews are completely qualitative, and include only topic areas and themes rather than standard questions.

Data collection takes the form of natural conversation between two or more people, and allows the interviewer to pursue follow-up questions or new lines of discussion as they see fit.

The interviewee is often asked to identify the information they feel is most important for the discussion.

(betterevaluation.org, 2014)
DISCUSSION

Ways in which *storybanking* might be used in *evaluation*:

How might storybanking be used to answer evaluation questions?

What kind of program lends itself to storybanking as a method of data collection?
“Recently, there has been a marked interest in the use of narrative in evaluation practice, reflecting the increasing attractiveness of narrative in social inquiry more broadly.”

(Constantino & Greene, 2003)
MSC can be very helpful in explaining **HOW** change comes about (processes and causal mechanisms) and **WHEN** (in what situations and contexts).

It can be useful to support *program theory development*. 
STEPS FOR USING MOST SIGNIFICANT CHANGE

1. Deciding the types of stories that should be collected

2. Collecting the stories and determining which stories are the most significant

3. Sharing the stories and discussion of values with stakeholders and contributors so that learning happens
MSC is particularly useful when you need different stakeholders to understand the different values that other stakeholders have in terms of "what success looks like."

MSC works best in combination with other options for gathering, analysing and reporting data. It doesn't provide comprehensive information about the impacts produced by an intervention.
PHOTOVOICE

The *intermingling* of images and words

Identifies and records *community* strengths and struggles

Explains *experiences* through critical reflection and group dialogue

Informs *decision-makers* and influences policy
"Group storytelling is a means of getting at experiences an individual is reluctant to claim or at material that might not be accessible to conscious thought." (McClintock, 2004)
Each group member contributes to a narrative about a made-up individual who participates in the program.

Convey the “psychological experience” of program participation (McClintock, 2004).

When working with youth or other vulnerable populations that may have reservations about openly sharing personal stories.

In group storytelling, the narrative can become exaggerated.
AEA Guiding Principles

A. Systematic Inquiry
B. Competence
C. Integrity/Honesty
D. Respect for People
E. Responsibilities for General and Public Welfare

NASW Core Values

1. Service
2. Social Justice
3. Dignity and Worth of the Person
4. Importance of Human Relationships
5. Integrity
6. Competence

(AEA, 2004) (NASW, 2008)
ETHICS

Confidentiality/Informed consent
Mandatory reporting
Triggering trauma/Service referrals
Asking leading questions
Body language
Transcription
Selection bias
The truth of the story
BEST PRACTICES

Train staff on empathic responses and ethical challenges

Provide supervision and debriefing

Have more than one person analyze stories and record verbatim

Deidentify and have a system in place for the protection of stories
What other methods would you like to discuss?
A MIXED-METHODS APPROACH

“No numbers without a story; no story without numbers”

(Global Fund for Children, 2011)
